Office - (866) 643-3472
Fax – (512) 858-1414

****COPY OF PHOTO ID IS REQUIRED****

SERVICE AGREEMENT: The following are the terms of the service agreement between Stonewall Water Control Improvement District (“the System”) and the Applicant.

- The service applied for on this application will be installed as promptly as possible upon payment of all charges. The connection is to serve only the property described on Page 1 of this Service Agreement.
- The Applicant understands the acceptance of these conditions shall constitute an agreement on the part of the Applicant, his heirs, executors, administrators and/or assignees to become bound by all terms and provisions of these Rules and regulations, and amendments thereto.
- Service may be discontinued if any rules of the System have been violated and service will not be resumed until the violation is corrected. A copy of these Rules and Regulations is available upon request. Charges for water service will begin when the water meter is installed or service is turned on.
- Any deposit amount herein stated is payable to the above named System upon application for service. The deposit shall bear no interest and is redeemable on discontinuance of service, less any outstanding charges owed to the System on that date.
- The System will maintain a copy of this agreement as long as the Applicant and/or the premise is connected to the Water System.
- The Applicant shall allow the property to be inspected for possible cross-connections and other undesirable plumbing practices. These inspections shall be conducted by the System or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the System’s normal business hours.
- The System shall notify the Applicant of any cross-connection or other undesirable plumbing practice that has been identified during the initial inspection or the periodic re-inspection.
- The applicant shall immediately correct any undesirable plumbing practice on their premises.
- The Applicant shall, at the applicants' expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System.
- The Applicant agrees to provide access to the water meter at all times, and to keep the meter area free of undergrowth, weeds and brush, or other obstructions.
- The Applicant must have a shut-off valve on their side of the meter. The Water System’s shut-off valve is to be used by the Water System personnel only.

PURPOSE: The System is responsible for protecting the drinking water supply from contamination or pollution that could result from improper plumbing practices. The purpose of this service agreement is to notify each Applicant of these plumbing restrictions that are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each applicant must sign this agreement before water service will begin. **In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.**

PLUMBING RESTRICTIONS: The following undesirable plumbing practices are prohibited by state regulations:

- No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
- No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
- No connection, which allows water to be returned to the public drinking water supply, is permitted.
- No pipe or pipe fitting which contains more than 8.0% lead exists in private water distribution facilities installed on or after July 1, 1988 and prior to January 4, 2014.
- No solder or flux which contains more than 0.2% lead exists in private water distribution facilities installed on or after July 1, 1988.

TEMPORARY WATER SERVICE: The terms and conditions to establish temporary water service are for the purposes of providing water service during the construction phase of a home or dwelling and such agreement is valid for 90 days. Once the home or dwelling is completed, additional requirements must be met prior to establishment of permanent water service. Those requirements include, but are not necessarily limited to the following: (1) a completed Applicant Service Inspection by an inspector certified by the State of Texas; (2) a proper, valid permit or license for an on-site wastewater system as required by state or local statute, rule or ordinance. Temporary water service may be renewed up to two (2) 90-day periods provided the applicant shows good cause for delays in obtaining permanent water service.

* PERMANENT SERVICE ESTABLISHED ON: _____

* APPLICANT SERVICE INSPECTION ON FILE? YES _____ NO _____

ENFORCEMENT: If the Applicant fails to comply with the terms of the Service Agreement, the System shall at its option either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the Applicant.

AGREEMENT AND ACKNOWLEDGEMENT:

By agreement made this date between the **Applicant** and **Stonewall Water Control Improvement District** (the System), the undersigned acknowledges BY SIGNATURE BELOW that this Service Agreement has been read and is understood, and hereby agrees to the terms and conditions herein stated.
